Montana Board of Oil and Gas Conservation Environmental Assessment

Operator: KeeSun Corporation
Well Name/Number Goeddertz 1A-17
Location: SE SE Section 17 T36N R03W
County: Toole MT; Field (or Wildcat) Wildcat
Air Quality
(possible concerns)
Long drilling time: No, 3 to 4 days drilling time.
Unusually deep drilling (high horsepower rig): No, small single derrick drilling rig, about
500 HP (Estimated) to drill to 1900' TD, Sunburst/Swift Formation test.
Possible H2S gas production: No H2S anticipated.
In/near Class I air quality area: No not in a Class I air quality area. Air quality permit for floring (repting (if productive): No. DEC air quality permit required.
Air quality permit for flaring/venting (if productive): Yes, DEQ air quality permit required
under 75-2-211.
Mitigation:
 X Air quality permit (AQB review) Gas plants/pipelines available for sour gas
_
Special equipment/procedures requirements Other:
Comments: No special concerns – using small rig to drill to 1900' TD. If there
aren't any gas gathering systems nearby, limited amounts of associated gas can be
flared under Board Rule 36.22.1220.
nared under board rule 66.22.1226.
Water Quality
(possible concerns)
Salt/oil based mud: No, freshwater, freshwater mud system, air, air mist.
High water table: No high water table anticipated.
Surface drainage leads to live water: No, closest drainage is an unnamed ephemeral
drainage, about 1/4 of a mile to the south of this location.
Water well contamination: No, no water wells within near this location. Surface hole in
this well will be drilled to 200' with freshwater and/or air. Steel surface casing will be run
and cemented to surface to protect ground water. (Rule 36.22.1001)
Porous/permeable soils: No, sandy silty bentonitic soils.
Class I stream drainage: No Class I stream drainages.
Mitigation:
Lined reserve pit
X_Adequate surface casing
Berms/dykes, re-routed drainage
Closed mud system
Off-site disposal of solids/liquids (in approved facility)
Other:
Comments: 200' of surface casing cemented to surface adequate to protect
freshwater zones (Rule 36.22.1001) Also, air/air mist and/or fresh water mud systems to
be used.

Soils/Vegetation/Land Use

(possible concerns)
Steam crossings: No, stream crossings anticipated.
High erosion potential: No, cut, up to 9.6' and fill, up to 6.7', required.
Loss of soil productivity: No, location will be restored after drilling, if nonproductive. If
productive unused portion of drillsite will be reclaimed.
Unusually large wellsite: No. 120'X220' location size required.
Damage to improvements: Slight, surface use is a grassland.
Conflict with existing land use/values: Slight
Mitigation
Avoid improvements (topographic tolerance)
Exception location requested
X Stockpile topsoil
Stream Crossing Permit (other agency review)
X Reclaim unused part of wellsite if productive
Special construction methods to enhance reclamation
Other
Comments: Access will be over existing county gravel road, Kevin North Road and
existing two track trail/lease road. Less than 1000' of access will be built off the existing
two track trail/lease road into this location. Cuttings will be buried in and unlined earthen
pit. Drilling fluids if used will be allowed to dry in the pit. Pits will be backfilled after
drying. No special concerns.
Health Hazards/Noise
(noggible concerns)
(possible concerns)
Proximity to public facilities/residences: No residence within a1 mile radius around this location. The town of Sunburst, Montana is about 4 miles to the east and the town of
Proximity to public facilities/residences: No residence within a1 mile radius around this
Proximity to public facilities/residences: No residence within a1 mile radius around this location. The town of Sunburst, Montana is about 4 miles to the east and the town of
Proximity to public facilities/residences: No residence within a1 mile radius around this location. The town of Sunburst, Montana is about 4 miles to the east and the town of Kevin, Montana is about 10 miles to the south southeast from this location. Possibility of H2S: No H2S anticipated.
Proximity to public facilities/residences: No residence within a1 mile radius around this location. The town of Sunburst, Montana is about 4 miles to the east and the town of Kevin, Montana is about 10 miles to the south southeast from this location.
Proximity to public facilities/residences: No residence within a1 mile radius around this location. The town of Sunburst, Montana is about 4 miles to the east and the town of Kevin, Montana is about 10 miles to the south southeast from this location. Possibility of H2S: No H2S anticipated. Size of rig/length of drilling time: Small drilling rig/short 3 to 4 days drilling time. Mitigation:
Proximity to public facilities/residences: No residence within a1 mile radius around this location. The town of Sunburst, Montana is about 4 miles to the east and the town of Kevin, Montana is about 10 miles to the south southeast from this location. Possibility of H2S: No H2S anticipated. Size of rig/length of drilling time: Small drilling rig/short 3 to 4 days drilling time. Mitigation: X Proper BOP equipment
Proximity to public facilities/residences: No residence within a1 mile radius around this location. The town of Sunburst, Montana is about 4 miles to the east and the town of Kevin, Montana is about 10 miles to the south southeast from this location. Possibility of H2S: No H2S anticipated. Size of rig/length of drilling time: Small drilling rig/short 3 to 4 days drilling time. Mitigation: _X Proper BOP equipment _ Topographic sound barriers

concern as the Hoary Bat, Golden Eagle, Burrowing Owl, Ferruginous Hawk, Chestnut-collared Longspur, McCown's Longspur and Brewer's Sparrow.

Mitigation:
Avoidance (topographic tolerance/exception)
Other agency review (DFWP, federal agencies,
Screening/fencing of pits, drillsite
Other:
Comments: No concerns
Historical/Cultural/Paleontological
(possible concerns)
Proximity to known sites: None identified
Mitigation
avoidance (topographic tolerance, location exception)
other agency review (SHPO, <u>DNRC Trust Lands</u> L, federal agencies)
Other:
Comments: No concerns.
<u> </u>
Social/Economic
(possible concerns)
Substantial effect on tax base
Create demand for new governmental services
Population increase or relocation
Comments: No concerns.
Remarks or Special Concerns for this site
Wallia a wildest 4000 Owel west/Owith Farmantian took
Well is a wildcat, 1900' Sunburst/Swift Formation test.
Summary: Evaluation of Impacts and Cumulative effects
No long term impacts expected. Some short term impacts will occur, but can be
mitigated.
I conclude that the approval of the subject Notice of Intent to Drill (does/ <u>does not</u>)
constitute a major action of state government significantly affecting the quality of the
human environment, and (does/ does not) require the preparation of an environmental
impact statement.
impact statement.
